EDUCATION

SOUTHERN NEW HAMPSHIRE UNIVERSITY
2025

B.S. in Game Programming and Development

SKILLS

- Unreal Engine 5 (UE5)
- Gameplay Programming & Debugging
- Systems Design & Interaction
- Player Mechanics
- AI Behavior Trees
- C++, Blueprint Scripting
- Python, Java, JavaScript, HTML
- Inventory Systems, UI, UMG
- Git, Bitbucket, Agile
- Iterative Development
- Blender, Figma, Aseprite
- FL Studio, Audacity, MetaSounds
- State Machines
- Object-Oriented Programming
- Data Structures & Algorithms

INTERESTS

- Soccer, Cycling, Hiking
- Music Composition
- PUBG Esports, Competitive Games
- Game Development
- Squishmallows

SUMMARY

Gameplay Programmer specializing in Unreal Engine 5 development using C++ and Blueprint scripting. Experienced designing and implementing gameplay systems, player mechanics, UI frameworks, and AI behaviors for real-time interactive experiences. Strong focus on clean architecture, performance optimization, and iterative gameplay design.

Background in competitive esports supports a systems-driven approach to player experience, balance, and feedback. Passionate about building responsive, scalable gameplay systems that enhance player engagement.

EXPERIENCE

TORCH SURVIVAL GAME

2024-2026

Lead Developer

- Designed and implemented core survival gameplay systems including resource gathering, health and fuel mechanics, and player interaction frameworks
- Developed gameplay features using C++ and Blueprint scripting with modular and reusable architecture
- Built inventory management and player HUD systems using UMG
- Implemented gameplay logic supporting exploration flow and environmental interaction
- Designed and constructed playable levels emphasizing player navigation and systemic discovery

DATA ANNOTATION

2025-2026

Freelance Data Trainer

- Trained large language models by creating, evaluating, and debugging code samples in Python and C++
- Designed math problems and solutions for AI training datasets spanning algebra to calculus
- Reviewed AI-generated responses for technical accuracy, logical consistency, and edge cases

WILDCARD GAMING

2020 - 2022

E-Sports Athlete & Analyst

- Utilized Python for performance analysis and team improvement
- Developed visualization diagrams to improve strategic decision-making
- Collaborated within structured team environments under performance constraints
